

## Avian Research Assistant

Dates of Employment: April 3-August 6, 2020

Positions are available to assist with an assessment of the abundance of breeding birds in Connecticut. Work entails conducting point count surveys, specialized surveys for secretive birds, data entry, and data proofing.

### Qualifications:

1. Minimum BS in wildlife science, ecology, biology, or related field
2. Ability to identify Northeastern US birds by sound and sight
3. Ability to navigate in the field
4. Ability and willingness to work individually for long hours in potentially adverse field conditions
5. Attention to detail and ability to work under stressful conditions
6. Ability to develop and maintain a database

### Responsibilities:

1. Conduct point count surveys for breeding birds
2. Conduct specialized surveys for secretive and difficult to survey birds
3. Maintain database
4. Error check data sheets

### Salary:

\$14/hour. No housing is available, but a field vehicle will be provided.
